Background & Problem Statement

01

Mission Statement: Stay ahead of the curve by identifying and investing in the most promising emerging technologies.

*Can we identify the the origin of Reddit posts
while minimizing Type II errors so topics of
interest (investment targets) are not missed?*

Reddit: A popular news and content **aggregation** site divided into communities (subreddits) by discussion topic.

Estimated ~55M daily users, projected to grow by 25% within 2 years

Target Subreddit

Subreddit 1: “Futurology”

A subreddit devoted to the field of Future(s) Studies and evidence-based speculation about the development of humanity, technology

- Titles and ideas aggregated may help identify areas for VC targets
- Popular links aggregated here may provide insight to other reliable news sources

02

Proposed Solution

Strategic planning project plan

ID

Identify technology
focused subreddit

Train

Train a model against subreddit
with some overlapping themes

Optimize

Minimize false
negatives (Type II)
errors

Extract

Extract popular
themes and
domains

03

Methodology

Subreddit 1: “Futurology”

A subreddit devoted to the field of Future(s) Studies and evidence-based speculation about the development of humanity, technology

- 19M subscribers
- 1695 posts

Subreddit 2: “Scifi”

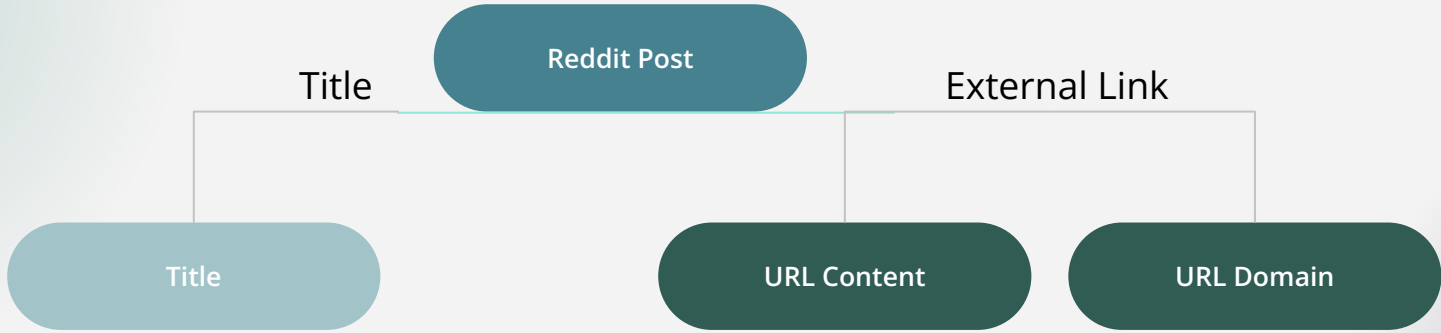

A subreddit centered around the Science Fiction or Speculative Fiction genre. “Laser guns, spaceships, and time travel”...

- 4.1M subscribers
- 1961 posts

Why URLs? Why no self text?

- Both subreddits feature a large amount of posts leading to external sites
- For this project, domains reddit.com and i.redd.it were ignored
- External links mean no self text, so titles were used instead

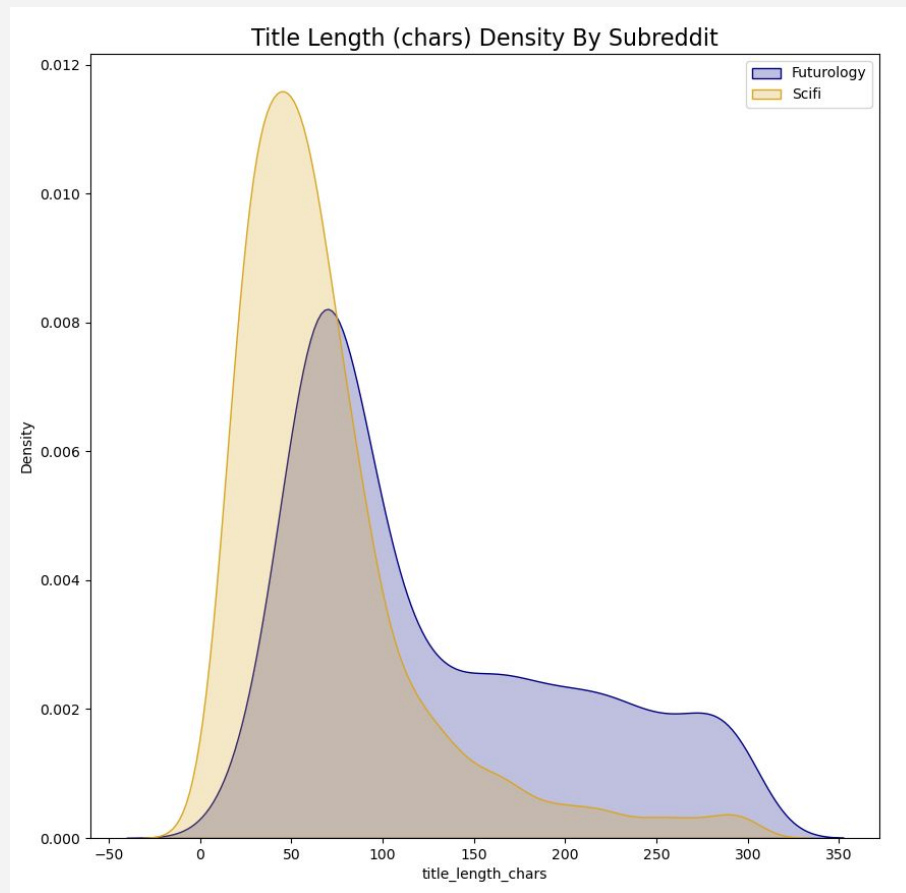

- Categorical
- Subject to NLP
 - WordNet Lemmatized
 - Vectorized

- Categorical
- Processed with custom URL tokenizer
- Subject to NLP
 - Vectorized

- Categorical
- Processed with domain extractor function
- OneHotEncoded

Interesting Aside - Why No Meta Features on Title like length?

- Initial impression was that they'd help based on visualizations like this one
- Removing it proved to increase both train and test score

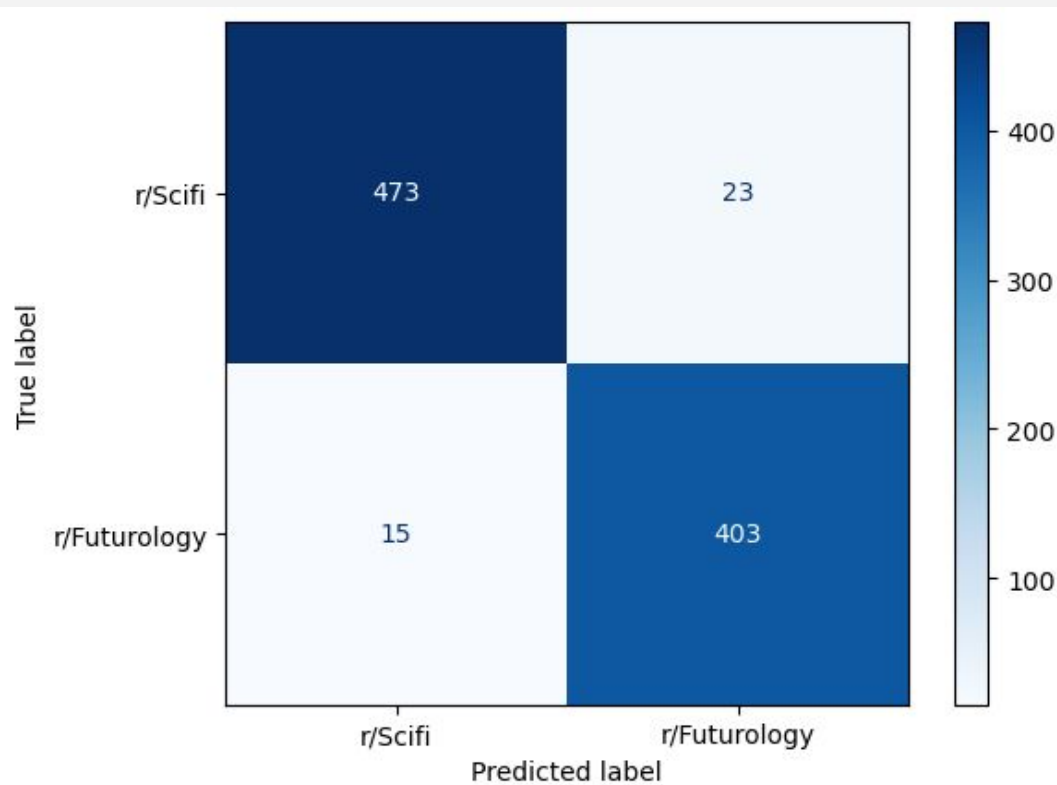

Model Analysis

| Model | Transformers | Test Data Results |
|---|---|--|
| Multinomial Naive Bayes | Count Vectorize (Title, URL content) One Hot Encode (URL domain) | Accuracy: 95.8% Recall: 96.4% All Data Accuracy: 98% All Data Recall: 96.5%  |
| Multinomial Naive Bayes | TFIDF Vectorize (Title, URL content) One Hot Encode (URL domain) | Accuracy: 95.9% Recall: 95.9% |
| Random Forest | Count Vectorize (Title, URL content) One Hot Encode (URL domain) | Accuracy: 91.5% Recall: 88% |
| C Support Source Vector Classification | Count Vectorize (Title, URL content) One Hot Encode (URL domain) | Accuracy: 92.5% Recall: 88.9% |

*Record for most expensive: Model 2 - with 155,521 models elapsing 37m,
"Friends don't let friends GridSearch"*

Confusion Matrix - Holdout Data

Optimized Type II Errors

- Model had highest recall; least likely to misclassify a true Futurology post
- Investigating false positives is cheap, missing potential leads is not

04

Insights and Recommendations

Most Common Futurology Title Terms (NGrams (2,4))

Invest in the future:

- Increase research into market growth and startup activity focused on areas like:
 - Climate change
 - Renewable energy
 - Facial recognition
 - Universal basic income effects
 - Self driving cars
 - Lab grown protein
 - etc

Most Common Externally Linked To Sources

Stay on the pulse:

- Increase monitoring of these websites for futurism articles gaining traction:
 - The Guardian
 - Business Insider
 - Interesting Engineering
 - Cnbc
 - Electrik
 - Reuters
 - Bloomberg
 - etc.

For your amusement - best of the false positives (Predicted Futurology but were Scifi)

What technologies could potentially be invented in the near future?

For your amusement - best of the false negatives (Predicted Futurology but were Scifi)

What technologies could potentially be invented in the near future?

Scientists at Harvard and MIT have collaborated to discover an entirely new form of matter. They have created molecules from light - and the properties of these new photon-molecules are similar to that of a LIGHT SABER

For your amusement - best of the false negatives (Predicted Futurology but were Scifi)

What technologies could potentially be invented in the near future?

Scientists at Harvard and MIT have collaborated to discover an entirely new form of matter. They have created molecules from light - and the properties of these new photon-molecules are similar to that of a LIGHT SABER

According to Nikola Tesla, Pyramids in the Egypt were giant transmitters of energy. What's your opinion? Is it true?
